1 Citation

If you wish to use any of the material from this report please cite as:

- Anderson, B. (2018) Processing, cleaning and saving NZ GREEN Grid project time use diary data, University of Otago: Dunedin, NZ.

2 Introduction

Report circulation:

- Restricted to: NZ GREEn Grid project partners and contractors.

2.1 Purpose

This report is intended to:

- load and clean the two time use survey datasets
- save the cleaned data out to /Volumes/hum-csafe/Research Projects/GREEN Grid/Clean_data/safe/TUD/ as two seperate files, one for each survey
- produce summary data quality statistics

2.2 Requirements:

Time use survey data held in /Volumes/hum-csafe/Research Projects/GREEN Grid/_RAW DATA/Time Use Diaries/:

- PowerCo
- Unison

A lookup table to correct mis-coding of household IDs (/Volumes/hum-csafe/Research Projects/GREEN Grid/_RAW DATA/TUD_2_GridSpyLookup.xlsx).

2.3 History

Generally tracked via our git.soton repo:

- history
- issues

2.4 Support

This work was supported by:

- The University of Otago
- The New Zealand Ministry of Business, Innovation and Employment (MBIE)
- SPATIALEC - a Marie Skłodowska-Curie Global Fellowship based at the University of Otago's Centre for Sustainability (2017-2019) & the University of Southampton's Sustainable Energy Research Group (2019-202).

We do not 'support' the code but if you have a problem check the issues on our repo and if it doesn't already exist, open one. We might be able to fix it :-)

3 PowerCo

This consists of 1 file found in /Volumes/hum-csafe/Research Projects/GREEN Grid/_RAW DATA/Time Use Diaries/Powerco/Powerco Annexes/:

- TUD (Merged data)_BA.csv

This is a version of TUD (Merged data).csv with:

- small edits to correct dates
- redundant rows removed from file header

3.1 Load & process

The following table summarises the PowerCo cleaned diary data. In theory we should have 1 diary per day per person - so a 1 person household should have produced 7 diaries... A 3 person household would produce 14 if there were two adults and 1 child (for example).

What was the age cut off for diary completion?

In total we have 352 diaries from 22 PowerCo households.

4 Unison

This consists of 5 files found in /Volumes/hum-csafe/Research Projects/GREEN Grid/_RAW DATA/Time Use Diaries/Unison/Unison Raw Data/Raw data with paper diaries included/Cleaned excel data files/:

- TUDAdult_ONE_Child_Unison_forSAS_BA.xlsx
- TUDAdult_TWO_Children_Unison_forSAS_BA.xlsx
- TUDAdult-THREE-Children-Unison_forSAS_BA.xlsx
- TUDAdult-Unison-forSAS_BA.xlsx
- TUDTeenagerorChild-Unison_forSAS_BA.xlsx

As before these are copies of the original versions with slight editing to correct dates and for ease of processing. The relationship between them is currently unclear!

Note thaty the tudCodes found in the .csv files are *not* the gridSpy household ids, we need to create these from the unison sheet in /Volumes/hum-csafe/Research Projects/GREEN Grid/_RAW DATA/TUD_2_GridSpyLookup.xlsx.

5 Summary

Total responses:

- PowerCo - 352 diaries from 22 households for the period 2014-08-23 to 2014-09-01.
- Unison - 363 diaries from 20 households for the period 2015-07-20 to 2015-08-09.

6 Runtime

Analysis completed in 10.24 seconds (0.17 minutes) using knitr in RStudio with R version 3.4.4 (2018-03-15) running on x86_64-apple-darwin15.6.0.

7 R environment

R packages used: data.table, lubridate, ggplot2, readr, dplyr, readxl, knitr

- base R - for the basics (R Core Team 2016)

- data.table - for fast (big) data handling (Dowle et al. 2015)
- lubridate - date manipulation (Grolemund and Wickham 2011)
- ggplot2 - for slick graphics (Wickham 2009)
- readr - for csv reading/writing (Wickham, Hester, and Francois 2016)
- dplyr - for select and contains (Wickham and Francois 2016)
- knitr - to create this document (Xie 2016)
- nzGREENGrid - for local NZ GREEN Grid utilities
